Other things to remember:

Construction:

- Vertical farm to supply goods to population?
- Provide several tenders for construction of the city to medium and small groups. Impose the concept that each building should have some form of artistic involvement to avoid copy-pasting the same structures everywhere. Every building a piece of art.
- Peace bell 20t for central clock tower.

Infrastructure:

- Light rail / Tram
- Mail warehouse, supplemented by loading / unloading zones w/ local parcel lockers. Automated code generation for parcel retrieval?
- Three road use categories:
  a) Logistical: Supports motorized vehicles for logistical concerns (Mail, EMS, etc.)
  b) Movement: Supports single or dual tram lines and bicycles for mass movement of people.
  c) Access: Supports bicycles and foot traffic allowing for interaction with shops and public services.
- Uniform utilities channel underneath / adjacent to roadways including: Water, waste, electricity.

International Collaboration:

- Offer free / subsidized medical services for neighboring countries if there is excess capacity?
- Require tax treaties with participating countries for the sake of citizens

Public Services:

- School lunch food distribution centre. Japanese-style distribution. Seasonal, regional foods.

Smaller governmental branches / Services:

- Garbage collection, Street cleaning, graffiti removal, sewerage, office cleaners
- Media rating board, Radio, Television (+ Syndication), Internet Authority
- Gardeners, Horticulture, Animal Control, Environmental Agency
- Road and Signage, License Authority, Snow removal, Towing Service, Maritime, Airspace Control, Public transport / Maintenance
- Sport authority, public events, Art & museum coordinator,

Planned statues:

- François Mitterrand and Helmut Kohl hand in hand.
- Edward Jenner and Viktor Zhdanov shaking hands.
- Nikolai Vavilov and those of the Institute of Plant Industry who died during the siege of St. Leningrad, all of which hold aloft a small sprouting plant.

Ordinances:

- State ordnance instructing the use of renewable containers for take-away. This could be implementing returnable, reusable metal canister scheme.
- Citizens are encouraged to wear civilian medals at parades.
- Offer existing married couples the clause present in the Constitution.

Land and Water:
- Soil contains Phaeozem, Cambisol, Leptosol soil types along the section of the Danube.
- Plant pollution-absorbing plants upstream to reduce burden for potable water processing.

Lab:
- Games room with board games, chess, crokinole etc.
- Securely-Housed Operational Data Aggregation Network (SHODAN) main server.

Other:
- High Court should have a painting of the current High Judge in the room.
- Constitution / official documents for storage made from vellum (Increased longevity)
- C omission State seal / seals of governmental offices to be manufactured.

Waste Management:
- High emphasis on recycling / sorting.
- Residential buildings have separate gravity chutes to collect garbage, food waste and recycling.
- Public bins are always paired with recycling bins
- Collection of smaller bins by electric vehicle, deposited into larger collection bins.
- Large bins and residences are serviced by conventional waste management buildings.
- Plan room for automated sorting facility.
- Discover connections with Serbia and Croatia to accept recycled / conventional waste.

Philanthropy:
- Mass produced reduced-emission stove for 3rd world countries. (maybe induction / solar combo)
- Mass produce bicycles (details in other documents)
- Reduce water scarcity
- Prevent desertification through experimental irrigation of arid locations (either passively through channel construction w/ mangroves or through other mechanical means.
- Swords to plowshares: Offer medical services in exchange for functioning firearms (Serbia)
- Commission public transport vs car research: Determine cost of construction / lifespan / cost of maintenance / throughput of persons / value

lost to land, demand of roads / income lost due to opportunity costs / case studies / pollution output, etc.

- Open modern kilns in Bangladesh, employ the “Dalit” and debt-bonded peoples, have Pannonia purchase said bricks (above market value) to induce demand, use bricks and manpower to make construction company, build adequate housing and schools. [Contact ‘SPARC’ group.] NOTE: Provide a snazzy, free police office for local police force adjacent to ensure the area is protected.
- Investigate / propagate GMO plant that produces & stores salts that can be refined for the production of batteries. (Electrolyte solution)

School:

- School lunches served similar to japan.
- Unisex uniforms including: Pants, Kilts, Shirts, Beret, Caubeen, etc.
- The uniforms should be stylish (and subsidized):
- There should be a merit system that can affixed to clothing such as patches / insignia for success in classwork (Top 10% / Merit Points / Year Completion / Community Service)
- The curriculum should allow for partially elected coursework, language studies, STEM and work placement opportunities.
